(b) Proposal 8-H-216A, dated 31 July '68, Secret, Serial CS-00-047.

Dear Sir:

Enclosed please find an informal report covering the recently completed work authorized under Contract SA-5304, Work Order No. 8. The report covers the high power microwave switch and the low level microwave limiter. The prototype switch and driver was delivered to [redacted] on the West Coast. The limiters are presently being used in the Mod "B" retrofit program under Contract SA-5308.

25X1A

We are currently investigating the feasibility of developing a higher power switch that will meet the requirements of the [redacted] system. A preliminary look shows that such a switch is feasible, and we hope to submit a proposal for this effort in the very near future.

25X1A

If you have any questions concerning this report, please call.
